

# *Tavern Talks:* Lung Scans for Smokers

January 23, 2017 | 6:30 p.m.

Park Lane Tavern, The Village at Spotsylvania Towne Centre

***Join us for heavy hors d'oeuvres and a free seminar about Low Dose CT lung scans.*** We'll hear from Dr. Jakob Schutz, Director of Body CT and Trauma Imaging at Medical Imaging of Fredericksburg. A lung scan is our region's quickest ways to detect cancer (sooner than a traditional x-ray). This Health Scan is recommended for those who are: Age 55-77 and have smoked at least 30 pack-years (pack-years = packs per day multiplied by years smoked), current smokers, or someone who quit smoking less than 15 years ago.
